

foreword

India is at an important moment in its journey. Across sectors, new ideas are emerging to address persistent challenges from unequal economic opportunity and exclusion to health, climate and education. But ideas alone do not create change. Changemakers need the right support, capital, technology and the space to test, learn and grow.

This is where the^delta plays a role.

the^delta brings together changemakers, ideas and capital to address India's most pressing challenges. We identify and back promising early-stage nonprofits, help organisations scale and harness AI for impact. We also run research-backed prize challenges to break barriers to work and entrepreneurship for underserved communities, with a focus on pathways to opportunity, adoption and scale.

Catalysts for Change celebrates the nonprofit organisations we have supported and the social entrepreneurs behind them. For the many people and organisations who have supported their journeys with time, expertise, capital, networks and encouragement, it offers a glimpse of the impact that becomes possible when promising entrepreneurs are found early, backed for their potential and supported to scale.

We are grateful to the Atal Innovation Mission (AIM), NITI Aayog, for recognising the^delta¹ as an Atal Incubation Centre and supporting our journey to find, back and build the social entrepreneurs shaping a more inclusive India.

These stories remind us that lasting change happens when talent, bold ideas and the right support come together. Here, we bring our social entrepreneurs to life, demonstrate what their work makes possible and look to inspire more people to back, build and catalyse change.

2. Impact numbers are life-to-date (June 2026), except livelihoods and income enabled for FY26. All impact figures are alumni self-reported and not comprehensive.
3. Apprenticeship and courtroom figures are driven by RightWalk and Adalat AI, respectively.

education & learning

creating pathways to better learning, stronger foundations and brighter futures

* Image sourced from Canva.

“Having attended most Shakti workshops, I observed a clear shift in how School Leaders and Gender Coordinator teachers see their roles. They now view gender equity and student well-being as part of everyday school practice rather than separate responsibilities. School Leaders are creating more spaces for dialogue and teachers are engaging with students more thoughtfully.

Overall, schools are becoming more student-centred, inclusive and responsive.”

-Dr. Shaik, Academic Monitoring Officer, Peddapalli

Strengthening education leaders for better student outcomes

Alokit is dedicated to improving student learning outcomes in under-resourced communities by strengthening school principals and public education systems. It equips school leaders to mentor teachers, improve pedagogy and create inclusive learning environments that enhance both learning and student wellbeing. Working in partnership with governments, Alokit delivers data-driven programs focused on foundational literacy and numeracy, school governance, leadership development, communication skills and gender-equitable schools. Leveraging internal dashboards and state portal data, it enables school leaders to drive institutional transformation and improve learning outcomes at scale.

"Peer Learning is the need of the hour—not just in schools, but at every stage of life—as it enables us to grow by learning from one another's experiences and strengths."

Involve Education

Facilitating peer learning spaces that build student agency

Involve Education Learning Solutions Foundation builds student agency through peer learning. It partners with governments, schools and civil society organisations to create student-led classrooms where children actively participate in learning, support their peers and develop leadership. Its programs strengthen foundational learning, improve academic outcomes and foster confidence, collaboration and ownership. By embedding student leadership into everyday classroom practice, Involve transforms learning experiences and enables children to develop the agency and skills needed to thrive.

"No one had asked me what I wanted to become or why. Through the wellbeing classes, I started thinking about my own dreams instead of only thinking about what others expected from me"

-Student in Daily Wellbeing Class

Wellbeing unlocks learning

Labhya transforms learning outcomes by embedding a daily wellbeing class within public education systems. In partnership with state governments, it equips government teachers to deliver structured wellbeing sessions that strengthen children's social-emotional wellbeing alongside academic learning. Evaluated through the world's largest randomised controlled trial on children's wellbeing by J-PAL South Asia, the model has demonstrated significant improvements in maths, cognition and anxiety reduction, showing that a low-cost wellbeing intervention can improve learning outcomes at scale.

"I learned a new language, coding with the LFE team and created an animation project. I want to learn more and code more."

Sana Salamtullha Khan, a Grade 6 student from Chinchwad, Pune, participating in Leadership for Equity's Future Literacy Initiative

Leadership for Equity

We envision public education systems that refuse to let children down

Leadership For Equity (LFE) is a student-impact organisation with a systems approach, working with state, city and district governments to strengthen public education. LFE began with teacher support and now focuses on making excellent teaching the norm in government classrooms by shaping the conditions to sustain it at scale. LFE sees teachers as the closest lever for children's learning, working through policy, financing, cadres and structures to improve teaching practices, classroom experience and student outcomes. It works across two core areas: Foundational Literacy and Numeracy (FLN) and Future Literacy Skills, equipping learners with foundational, digital, computational and 21st-century skills.

They make learning exciting, so I like learning more every day. I listen carefully, think creatively and feel more confident. Now I can read without mistakes and solve maths problems on time. This makes me feel happy and proud and I enjoy my class.”*

Madhi Foundation

Foundational learning first, so every child can thrive

Madhi Foundation is working to ensure every child acquires strong foundational learning. It believes lasting improvements happen when entire education ecosystems work together, not in silos. Through partnerships with governments, it strengthens public education systems and enables parents and communities to become active partners in children's learning. Madhi was the Chief Management Partner for Tamil Nadu's official Foundational Learning Mission, Ennum Ezhuthum (Literacy and Numeracy Mission). Its work supports over 37,000 schools, 1,00,000 teachers and 27 lakh children across Tamil Nadu and is expanding through partnerships with the governments of Meghalaya and Nagaland.

MakerGhat

To nurture employable and entrepreneurial citizens through hands-on making

MakerGhat is a grassroots STEM and AI learning movement that works with governments to turn under-resourced public schools into hubs of hands-on, future-ready learning. It currently reaches 25,000+ schools across India through makerspaces, teacher training and open-source curricula and trains 22,000+ teachers annually in experiential, project-based pedagogy. Anchoring & leading the Shikshagraha STEM Collective, it works with state and district education departments to design, pilot and scale systemic programs around STEM and AI literacy, using a “district as the unit of change” approach.

"I couldn't educate my first two children. We had to run the household and there was no steady income. It was a hardship. However, I made up my mind that my daughter would definitely attend school. I did everything I could to send her. Today, she is pursuing a Bachelor's degree. Now, I tell other mothers that education must come before marriage. If she learns, she will understand; if she understands, she will bring change." Rita Devi, Member, Shiksha Chaupal, Mushari Block, Muzaffarpur

Mantra4Change

Transforming public schools in India for millions of children through sustainable and continuous school improvement

Mantra4Change works to strengthen public education in India. It enables sustainable and continuous improvement across the three environments that shape a child's learning journey: classrooms, schools and communities. In partnership with the Ministry of Education, state education departments and civil society organisations, Mantra4Change works to strengthen education leadership at every level of the system. It builds the capacity of institutions and stakeholders to drive meaningful and sustained school improvement. Through collaboration and collective action, it strives to ensure that every child receives an enriching learning experience. Today, its work spans 6 states, reaching 2.2 lakh schools, 2.8 lakh school leaders and teachers and 32.2 million children.

“Before AI Saksham, their AI program, I had heard about AI but never imagined I could use it in my classroom. The program gave me practical exposure to AI tools and techniques to leverage AI in a creative and personalised way for my students. Today, I feel much more confident designing activities, generating teaching resources, and encouraging children to think critically. More importantly, AI Saksham has changed my mindset; I no longer see AI as something complicated. I now feel empowered to prepare my students for the future.”

-Seema Ma'am, Government School Teacher, Noida

Muskaan Dreams

A world where every child leverages technology to thrive in the evolving digital future

Muskaan Dreams is a social impact technology nonprofit working with governments to prepare children in public schools for an AI-enabled future. It integrates STEM, AI, and 21st-century skills into classrooms through sustainable, government-owned models. Since its inception, the organisation has supported more than 15,000 teachers and worked across over 5,000 government schools, to reach more than one million students by 2026. By strengthening public education systems through scalable, evidence-backed models, Muskaan Dreams equips children with the skills they need to thrive in the future.

"By partnering with Vinoba and working consistently with our teachers and students, we are driving an educational transformation in the district. We are confident that these efforts will not only strengthen foundational learning but also help shape capable, talented and responsible citizens for the future."

-Akash Chikkara, Collector, Bastar

Open Links Foundation

Make government schools aspirational by improving the quality of education

Open Links Foundation (OLF) leverages technology, behavioural insights and district-level leadership (IAS officers) to improve the quality of education in government schools by supporting and motivating teachers and improving program implementation efficiency. With the Vinoba app at its core, OLF has built a scalable, systemic model for educational transformation. It enables centralised district-teacher communication, fosters a vibrant teacher community through peer learning and drives student academic and life skills development through rapid feedback loops and efficient program implementation. OLF's model has led to tangible improvements in learning outcomes for 4.8M students across 68,000 schools in 39 districts and this is growing.

"The environment I found at Peepul's school was extraordinary. It motivated me to speak. I was never stopped or criticised for speaking up and that gave me confidence. My teachers knew that it's through engagement that we learn more. I got that environment early on, giving me the confidence of pursuing a field as tough as neurosurgery." Pragya, ex student, Exemplar School

We strengthen government systems to build high-engagement classrooms and better learning.

Peepul partners with state and the central government in India to improve learning outcomes across public school systems. Its work is grounded in an insight: student engagement inside the classroom is a critical driver of learning and central to system transformation. Rather than operating parallel programs, it strengthens government capacity, enabling governments to remain the primary doers, payers and long-term owners of change. Its model operates through two integrated pillars: Academic Coaching, which strengthens classroom practice and Academic Governance, which embeds the systems, routines and accountability needed to institutionalise instructional improvement and sustain learning outcomes.

"Earlier, there was little clarity in how we taught children at Anganwadis. Through Rocket Learning, we now use activity-based videos and receive regular technical training, which has improved our teaching skills. I recently passed the exam to become a Supervisor in Uttar Pradesh. I truly credit Rocket Learning for building a strong educational foundation for both children and Anganwadi workers."

Geeta Devi, Anganwadi Worker, Uttar Pradesh

Rocket Learning

Building early childhood development at population scale

Rocket Learning transforms early childhood development for underserved children by strengthening government systems to improve school readiness at scale. In partnership with ICDS and state governments, it equips Anganwadi educators through a blended model combining technology and on-ground support, delivering play-based learning, continuous micro-training and data-driven engagement via WhatsApp. By embedding its model within public systems, Rocket Learning enables scalable improvements in foundational learning for children aged 0–6.

"My name is Akshita and I'm a student of Grade 5. I used to be really scared of maths, especially multiplication and division... over the past year, since I started doing Saarthi practice sheets, that fear has gone away! Now I feel more confident every day... maths feels easy and fun... I've also noticed that my memory has improved a lot... I'm no longer afraid of maths—I love it!"

Every child in India masters basic maths via deliberate practice

Saarthi Education builds foundational numeracy for children in Grades 1 to 5. It works inside government and affordable private schools across Delhi, Uttar Pradesh and Haryana. Its approach is narrow on purpose - most children get taught maths but never get enough practice to master it. So, it redesigns classroom time around daily, structured practice and trains teachers to run it. Its research series, Mind the Practice Gap, tracks whether Indian policy and curriculum leave room for practice at all and how it can be fixed at scale.

*"Through our drawings, we have brought to life the story of our village pond and the animals that live there. This drawing is not just a picture, but a reflection of our village's natural beauty." —
Students, Class 6, 7 & 8, Govt. Middle School Pakela , Chhindgarh, District - Sukma*

Enabling positive childhood experiences for children growing up in crisis.

Shiksharth is working to create positive childhood experiences for children growing up in conflict-affected areas, regions vulnerable to natural hazards and challenging geographies. Currently they are headquartered in Bastar division in Chhattisgarh covering districts Sukma, Dantewada, Bijapur, Narayanpur. It has supported over 2,000 schools and programmatically served more than 350,000 children across 10 highly challenging districts and continues to build resilient education systems in some of India's most challenging geographies.

"Slam Out Loud has given me these tools and has helped me find a way of expression that just holds me when I need it the most. When I do not have a friend to talk to, when I do not have somebody close to me I can share my feelings with, I turn to writing."

SOL student, finished with her undergrad on a full scholarship and has joined a company as a Creative Writer earning 8 LPA.

Slam Out Loud

Reimagining learning through the arts, so every child can flourish.

Slam Out Loud builds future-readiness skills — agency, imagination, curiosity, and emotional awareness — using the visual and performing arts. The model is systemic, utilising the existing art period. Educators deliver this in classrooms across four cities, while partnerships with state governments embed it into curriculum, training, and measurement at scale. Backed by a completed Harvard/Max Planck RCT and an ongoing J-PAL RCT, SOL has built these skills with 700,000+ students, measured through competency-based assessments rather than self-report. SOL also selects children with a long-term interest and ability in the arts and creates mentorship, platforms for their work, and pathways into creative careers.

"Before SwaTaleem, I did not know what my daughter studied in school. Now their weekly [IVRS] calls tell me everything — what she learns, what she dreams. I share it with my husband. We ask questions. We attend school meetings. My younger daughter, who hated school, now loves learning. SwaTaleem did not just change my daughters — it changed our whole family."

Gita, Parent, Sirsa, Haryana, IVRS Parental Engagement

SwaTaleem Foundation

Equipping girls to write their own futures.

SwaTaleem— meaning "owning your education" — works with historically marginalised adolescent girls in government schools to build agency through ecosystem change. Its village-based model engages every layer of a girl's world: girls receive structured SEL, English and career sessions; wardens are trained to deliver curriculum and become better caregivers; parents are reached through Mitwa, an AI voice-bot; and government becomes an active partner through gender-transformative advocacy. SwaTaleem reaches 45,000+ girls across 250+ schools in Haryana, Karnataka and Uttar Pradesh — with ambition to reach 7.5 million by 2033. True education, they believe, makes every girl the captain of her own life.

“Ever since I started coding, I can understand technical concepts. I even help my father with his work now. I even started a startup called ‘Just Play’ with a small group of 5 people from my school, where we experiment with Roblox characters.” Rishav speaking of the coding program of The Mentor Me Foundation

The Apprentice Project

Building 21st-century skills in under-resourced children through a scalable, AI-enabled learning system

The Apprentice Project (TAP) is an AI-enabled education non-profit that partners with government school systems to build critical skills such as problem-solving, creativity, critical thinking and financial literacy. TAP emerged from the founders' experiences as educators and their understanding of gaps in real-world, application-based learning for students in government and under-resourced schools. Through choice-based, technology-enabled and project-based learning programs, TAP works with teachers, schools and public education systems across Uttar Pradesh, Delhi, Maharashtra and Punjab, impacting over 1.5 lakh students in 2025-26

The Education Alliance

To build the evidence, partnerships and system capacity required to ensure that every child can reliably access a learning-ready school

The Education Alliance (TEA), registered as the Network for Quality Education Foundation, is a non-profit organisation working to strengthen India's public education system so every child can access a learning-ready school. TEA partners with governments to improve school infrastructure, teacher deployment, instructional systems, leadership and governance through evidence-based reforms. By building system capacity, generating evidence and forming strategic partnerships, the organisation supports sustainable improvements in public education, making quality learning opportunities accessible at scale for children across India.

Gauri (Class 6, Lucknow) had never played before. Now, she rarely misses any TRP session at her school.

“Sports make me feel happier and more energetic.”

It also helped her move beyond household chores often inflicted on girls.

Gauri is now part of the winning team and an emerging bowler.

The Right Pitch | The Unifly Collective

Building a movement to empower children with 21st-century skills through sports and co-curriculars

The Right Pitch (TRP) is a sport-for-development initiative that uses cricket to help children develop essential 21st-century skills. Together with The Unifly Collective, a sister initiative, it aims to transform the lives of 1 million children by 2030. Working primarily with government and affordable private schools, TRP creates inclusive opportunities for every child to Play, Lead and Learn, regardless of background. Through structured cricket coaching integrated with reflective learning, children build communication, collaboration, critical thinking, creativity, confidence and a growth mindset. TRP partners with educators and communities to expand access to play-based, project-based learning in underserved regions of India.

The Learning Equaliser programs helped Anuska see that gender should never define ambition. Inspired by stories of women breaking barriers, she confidently shared, "The first driver of Vande Bharat Express was a woman. If she can do it, I can also become a loco pilot one day."- Anushka Mondol, Class 9, West Bengal, The Learning Equaliser programs

Transform Schools

Improving learning outcomes for secondary-school children in India

Transform Schools works to improve learning outcomes for middle and secondary school students across India through a whole-systems approach: engaging teachers, Head Teachers and state-level system actors as partners in designing, testing and scaling solutions that governments adopt and sustain. Its strategic focus is the last five years of schooling (ages 13–18) — the period when learning poverty deepens, dropout rates climb and the gap between what adolescents need and what schools deliver is widest. It is committed to improving transition rates from primary to secondary, reducing learning poverty and keeping more adolescents: especially girls, Dalits, Tribals and children in aspirational districts: in school and learning.

“When I joined Aaroogya, I learned to screen women in my community using the MyHealthline app. Earlier, women here would never go to a hospital until it was too late. Now they trust me because I am one of them, I have screened hundreds of women door to door and this work has given me both an income and respect in my community. Today, women come to us at the Aaha AI Kiosk for further care.”

Aaroogya Foundation

Bringing AI-powered healthcare to every woman

Aaroogya Foundation is committed to ensuring that no woman dies from a disease that could have been detected early. The organisation has used AI-powered screening to make breast cancer and women's health diagnostics accessible through frontline health workers, clinics, community health camps and multilingual AI health kiosks. By bringing early detection directly to underserved communities, the foundation reduces barriers to timely care and connects women with appropriate treatment pathways. It also equips and trains frontline health workers to deliver screening services, creating sustainable, community-led healthcare systems that improve access to preventive care and early intervention.

"The support, guidance and regular follow-up provided by the Fortify Health team helped us successfully implement this initiative. At the same time, chapatis prepared from fortified atta maintained their taste, softness and quality, with no noticeable difference from regular atta while providing added nutritional benefits." Vishwatmak Janglidas Maharaj Ashram Trust (VJMAT Trust)

Fortify Health

Reduce iron-deficiency anaemia

Fortify Health is reducing iron deficiency anaemia at scale by making it hassle-free to fortify wheat flour. Wheat flour is the core food staple for over 500 million Indians. Through effective fortification, it will be possible to reduce anaemia rates by 30% at a population level. It supports industrial wheat flour millers and many government organisations to fortify chakki atta with iron, folic acid and Vitamin B12, in line with standards set by the Food Safety and Standards Authority of India (FSSAI). It is reaching more than 20 million beneficiaries monthly and is considered one of the most cost-effective global health interventions.

“Earlier we used to travel 20 km from here to Peth to get even the most basic of health check ups done. It was quite expensive to travel and get there. We would spend nearly INR 500 to 1200 for something as basic as a blood test. The team does blood tests, checks blood pressure and does eye examinations. With this telemedicine service, we can save a great deal on not just tests, but also medicines. Whatever money we were spending on travel and medication, can be saved now.” Mangala Mohan, a resident of Nashik

Intelehealth

We deliver quality healthcare where there is no doctor

Intelehealth is expanding equitable access to high-quality healthcare through an AI-enabled, open-source telemedicine platform designed for underserved rural communities, particularly women and marginalised populations. Built for low-bandwidth settings, the platform enables health organisations to deliver timely, evidence-based care by equipping frontline health workers with Ayu, an AI assistant featuring over 150 clinical protocols, screening and history-taking tools, clinical decision support and virtual doctor consultations. Ayu also reduces administrative burden, improving diagnostic accuracy by 12% and reducing consultation time by 47%, while strengthening last-mile health systems and ensuring expert care reaches communities where it is needed most.

"Through TAF, we received a flipbook where all the schemes we provide are clearly explained... Whenever I feel unsure about something, I refer to the flipbook to understand it better... It helps me train ASHAs while also strengthening my own knowledge. Earlier, people believed that girls were of no use... They didn't see the value of educating girls... Today, in our village, people have become more conscious about education. They no longer discriminate between boys and girls."

Sangeeta, Community Health Officer, Betul

The Antara Foundation

Because every mother and each child deserves an equal start to a healthy life

The Antara Foundation (TAF) partners with governments and communities to strengthen public health systems and improve maternal, newborn, child health and nutrition outcomes. It works across both the supply and demand sides of care—building the capacity of frontline workers, supervisors and nurses; improving coordination, data use and quality of services; and empowering women, families and communities to seek timely care and adopt healthier practices. Through models like the AAA Platform, nurse mentoring and digital tools, TAF strengthens last-mile delivery, engages informed communities and helps governments institutionalise and scale effective solutions.

Edel Mary Queen, a resident of L.R. Nagar, begins each day by preparing her children for school before heading to work at Johnson Market. After her second pregnancy, she began experiencing irregular periods but had little time to seek care. Through Asha, an Uninhibited Swasthya Saathi, she connected with the Hello Saathi telemedicine helpline, where a doctor guided her through medical tests, treatment and dietary changes. "They regularly supported me with guidance and care. Now, things are much better and manageable. Periods are no longer a reason for me to miss work," she says

Uninhibited

To advance menstrual health and well-being through evidence, knowledge sharing, partnerships and systems change

Uninhibited advances menstrual health as a critical indicator of the overall health and well-being of people who menstruate. Working across research, programming, advocacy and systems change, the organisation strengthens adolescent health, health systems, digital innovation and evidence generation. Through its Menstrual Health Hub (MHHub), a global knowledge exchange and advocacy platform, Uninhibited synthesises research, lived experiences and ecosystem learnings to influence policy, strengthen menstrual health systems and support governments, civil society organisations, researchers, funders and communities in advancing menstrual health as a public health priority.

"Intercropping papaya with chickpea and black cowpea has helped me make better use of my land while creating multiple sources of income. With technical support from AGRO RANGERS, I feel more confident about building a resilient farming system for my family." Ajit Nilakh

Agro Rangers

Creating sustainable livelihoods for farmers through regenerative agroforestry that improves soil health and builds climate resilience

Agro Rangers is working to restore degraded landscapes and improve farmer livelihoods through regenerative agroforestry in drought-prone regions of Maharashtra. We partner with small and marginal farmers to establish climate-resilient farming systems that improve soil health, enhance biodiversity, strengthen water conservation and create sustainable sources of income. Our work combines plantation support, farmer training, technical guidance, community mobilisation and long-term monitoring to ensure successful adoption of agroforestry. By bringing together communities, government, corporate partners and philanthropies, we aim to build resilient rural ecosystems where people and nature thrive together for generations.

Farmers for Forests

Flourishing forests, thriving farms, prospering people

Farmers for Forests (F4F) is dedicated to combating climate change by increasing India's biodiverse forest cover while enhancing farmer livelihoods. Using a Payment for Ecosystem Services (PES) model, F4F incentivises farmers to transition degraded land into agroforestry, providing dual revenue streams from produce and carbon credits. It uses open-source AI and drone technology to track tree survival and quantify carbon sequestration. Its work spans deforestation prevention, urban biodiversity hubs and human-elephant coexistence, fostering long-term environmental and economic resilience across rural India. It has reached 25,000 farmers, with 500 from the 2022 cohort realising income increases after three years.

Ambavi Bai from Usar Village in Kumbhalgarh Block, Rajsamand district, Rajasthan, cultivated ridge gourd using the trellis farming technique for the first time. She shared that this intervention helped her become financially independent. She earned ₹75,000 from the sale of ridge gourd.

Gramshree

Empowering 1 million tribal families by 2040 through integrated livelihoods

Gramshree Foundation Trust is a livelihood-focused non-profit working to reduce poverty among tribal communities through sustainable agriculture and value-chain development. The organisation partners with tribal families to build resilient income-generating models centred on natural farming, vegetable cultivation, nursery entrepreneurship and market linkages. By promoting climate-resilient agricultural practices and enterprise development, Gramshree enables communities to improve productivity and access better economic opportunities. Its interventions strengthen local entrepreneurship, enhance household incomes and foster long-term self-reliance.

"Before Jaljeevika, I sold our farm produce to whoever came first. Now our FPO sells directly to a processor at a fixed price , more price than what the middleman ever offered. this year, we started promotion of biofortified cereals to ensure nutritional security with tribal households.."

Kendriya Balaji, Director-Fish Farmer Producer Organisation, Ashifabad

Water for livelihood, livelihood For all

Jaljeevika believes India's 28 million smallholder fish farmers and fisherfolk are an entrepreneurial force that can thrive with institutional support. As a platform architect, it builds institutions, digital systems, knowledge networks and market linkages transforming subsistence activity into dignified enterprise. Jaljeevika has shown that combining inputs, advisory, access to government schemes and markets increases incomes, regenerates water bodies and expands women's leadership for farming households. Its AquaRise programs demonstrate a scalable, community-governed platform for 50,000 aquaculture-dependent households, proving India's Blue Economy transformation begins at the pond, not at the policy level.

Lina Devi earned about ₹14,000 on just 1,742 square feet in the four-month Rabi season of 2024 by adopting multi-cropping based on knowledge obtained from Khetee. She cultivated fruits, vegetables and Napier grass for silage production

Khetee

Empowering communities through agroforestry

Khetee promotes agroecological farming using the model of agroforestry which keeps the prosperity of a farmer and nature together at the centre. They have developed a unique fellowship program for farmers and aspiring farmers to enable them to build agroecological model farms. Additionally, they also organise training programs for farmers for their capacity building in regenerative farming. Khetee is striving for systemic transformation in the way agriculture is practiced, its relationship with the market and the policies that are made around it.

Aavishkaar

Nurturing curious, creative & critical thinking citizens of tomorrow

Aavishkaar is a centre working to make high quality maths and science education accessible to every child, regardless of background. Aavishkaar does this by building a network of skilled, confident educators, training in-service teachers directly (in Govt., non profits, schools spanning low, mid and high income communities) and equipping young women from underserved communities with a career pathway as dedicated maths educators through its residential and digital fellowship programs. Together, these efforts ensure every child, in government, private, or high end schools, receives the same high quality STEM education.

The CareerShala programs helped me explore different career options and gain a clearer understanding of myself and my goals. It inspired me to aim for becoming an IAS officer by showing the journey involved and the importance of early preparation. The programs also introduced role models whose experiences provided valuable insights. Additionally, I learned about alternative career paths like fashion design. Overall, CareerShala broadened my awareness of opportunities and helped me clarify my interests.

~Class 12 Student, BD Inter College, Bhagwanpur

Alohomora

Unlocking careers, confidence and hope for India's young people

Alohomora Education works to institutionalise career guidance and transition support within India's public education system so young people can make informed decisions about their futures. It designs school-embedded solutions that build career awareness, confidence, decision-making skills and access to opportunities for adolescents and youth. Working with governments, multilateral agencies and ecosystem partners, Alohomora strengthens public systems through teacher capacity building, structured career guidance curricula and systems strengthening, enabling quality career support to reach young people at scale, particularly in underserved communities.

"Folk music carried truth and authenticity because it comes from what we see, feel and live through. Beware of the cunning ones, who keep playing new tricks, in this world, few are left, who stand by you with a true heart. Anahad's work gave us confidence that will span across generations, carrying this legacy."

-Late Jumme Khan

Anahad Foundation

Empowering folk musicians through production technology

Anahad Foundation is dedicated to the recognition, preservation and evolution of India's folk music. Through innovative initiatives such as Backpack Studio and Equals, it enables rural musicians with access to production technology, copyright awareness and songwriting skills, helping them thrive economically and gain global visibility. Its mobile recording studio brings professional-quality production to artists in remote areas at no cost. Anahad has helped artists triple their incomes and documented more than 500 folk groups, building sustainable livelihoods while safeguarding India's rich cultural heritage.

“When I first started preparing for competitive exams, I didn't have access to a good study environment or the books I needed. AMF's Bansa Community Library changed that. It gave me a place where I could study every day without interruption, access quality resources and stay motivated alongside other aspirants. Clearing SSC CGL has been a life-changing milestone for me and I will always be grateful to AMF for making quality learning accessible to students like me.” Akash Kumar, AMF Discover program

Aruna Mithlesh Foundation

Reimagining community libraries as livelihood launchpads

Aruna Mithlesh Foundation (AMF) advances educational equity and community-led development in underserved rural communities. Through a network of community libraries, a mobile library and learning hubs, AMF provides free access to books, digital resources, reading programs, career guidance and academic support for children, youth, women and first-generation learners. Beyond education, the organisation promotes livelihoods through employability, entrepreneurship, digital literacy, financial inclusion and leadership development. AMF operates 12 community libraries and a mobile library serving 230 villages, creating locally owned ecosystems that expand learning opportunities, strengthen livelihoods and empower communities.

“The industry visit to VITS Hotel was a remarkable experience for me. This was the first time I visited such a hotel. I was surprised by the diverse educational backgrounds of the professionals working in the hospitality and tourism industry, from meeting the chef in the kitchen to learning about housekeeping, finance and front-office operations. It has inspired me to explore career options in this field, especially the learn-and-earn opportunity to financially support my family.”- Aarushi Jadhav

Asudé Foundation

Designing the world as a playground for learning

Asudé is a learning design lab working at the intersection of learning and design. Since 2020, we have made career and experiential education accessible to underserved students across government and tribal schools in Maharashtra, reaching over 40,000 students. We design platforms, experiences and tools that take learning beyond classrooms.

Our flagship IndustryConnect.app, India's first district-wise technology platform, connects tribal and rural schools with industries and mentors. While Career City, our career-exploration city building game, helps students discover real-world careers and education pathways through play.

Naima Kanan Board Member, Lekope Majuli Women Farmer Producer Company Ltd. says, “When Lekope began, I never imagined that women like us could lead a business company. Today, I’m part of Lekope’s Board, represent thousands of women producers and participate in decisions that shape our company’s future. Through Ayang’s support, I have grown from being a producer to becoming a leader, while increasing my family’s income and inspiring other women in my village to believe that they too can lead.”

Ayang Trust

Building thriving communities through community-led, dual-generation development

Ayang Trust is a grassroots nonprofit building thriving communities across Northeast India through a dual-generation approach integrating education, livelihoods and climate resilience. Ayang works alongside rural and tribal communities to create place-based, community-led solutions that expand opportunities for children, women and families. Its work spans quality education, women-led entrepreneurship, sustainable agriculture, producer collectives, disaster resilience and systemic resilience. Today, it operates across Assam and Arunachal Pradesh, demonstrating how locally rooted institutions can enable dignified livelihoods, stronger learning outcomes and resilient communities.

"My mother alone raised my younger brother and me, working as a cook. I never imagined a life outside my small locality, I hadn't seen anyone near me do that. Then at my government school in Saharanpur, studying humanities, I came across CodeYogi and learnt about AI and software building. I studied mostly on my mother's phone and later got a laptop through CSR support. I went much deeper from there and today, straight out of school, I'm interning as an AI developer building state-of-the-art AI and tech solutions. Next year, I'll be mentoring other students in my district."

-Payal Bharadwaj, CodeYogi Foundation

CodeYogi Foundation

AI-first skilling for India's underserved youth, at smartphone scale

CodeYogi transforms any smartphone into an AI lab. Most AI and tech-skilling programs require computer labs and trained teachers — both of which are hard and slow to scale. CodeYogi is built to work without either, right on students' family smartphones. Its AI mentor guides each student, in their own language, from beginner to hands-on AI and software development fluency with structured lessons, real assignments and personalised evaluation. CodeYogi runs through district and state government partnerships, supporting Digital India and NEP mandates at zero cost to the state, with no new infrastructure needs and no additional burden on teachers.

“I come from a community where girls get married in their teenage years. Eklavya not only guided me but gave me confidence to study at prestigious institutions like Fergusson College in Pune. I am the first woman in my village to travel to Pune for education... I have recently secured a place at the Young India Fellowship at Ashoka University with a ₹10 lakh scholarship. I am mentoring my younger siblings and other girls in my community to pursue higher education and meaningful jobs.” Shruti Bothare

Eklavya India Foundation

Opening pathways to top-tier higher education, leadership & socio-economic mobility for first generation students

Eklavya opens pathways to top-tier higher education, leadership and socio-economic mobility for first-generation students from historically marginalised communities. Founded in 2017 by Raju Kendre, a first-generation learner from a nomadic community, Eklavya works across the school-to-college continuum for youth aged 16–30, connecting students to 100+ leading institutions in India and globally, including IIT, IIM, Harvard and Oxford. Eklavya has delivered 1 million+ hours of mentorship and training, reached 600,000+ students, placed 4,000+ across top institutions and facilitated INR 75+ crores in scholarships. Its 1,000+ alumni have seen average incomes rise tenfold, helping households break the cycle of generational poverty, with many returning as community leaders.

“For two years I’ve mixed biochar from Paddy Straw made by Energy harvest Trust on my onions, garlic and fruit trees. The roots go deeper, the soil holds water longer and the harvest speaks for itself.”

Amandeep Singh, Organic Farmer

Energy Harvest

To support research, education, training and solutions deployment to improve the environment and farming community life

Energy Harvest System works to reduce the open burning of paddy straw by developing and commercialising practical technologies for its productive use. The organisation promotes sustainable alternatives that convert crop residue into biomass-based products and clean energy, helping reduce air pollution while creating additional value for farmers. By supporting efficient collection, processing and utilisation of agricultural waste, Energy Harvest System contributes to improved crop residue management and demonstrates how paddy straw can become a useful resource instead of an environmental challenge.

“When tourists come, it contributes to the development and prosperity of the village. Visitors get a chance to live closely with the local culture and they learn to value and respect it. It also provides an opportunity for cultural growth and development.”

Jamnalal Kumhar | Village Tourism Project (Pilot)

Gramiyo Foundation

Travel differently; travel with villages

Across India's tourism states, villages are the destinations in waiting. Their landscapes, food, craft and living culture are what travellers are increasingly seeking for immersive experiences, yet the communities who hold these assets remain outside the economy built around them. Gramiyo works from the pre-market readiness stage, onboarding village women and youth through the Village Tourism Project, a village tourism micro-entrepreneurship program, to build the confidence, capacity and ownership structures they need to participate in rural tourism. When they are ready, their village finds its place on gramiyo.com, a discovery and booking platform for village experiences across India.

Manisha, who participated in the Girl Boss Future Ready program (2025-26) says, *“I built a small business on my own to fund my studies, but I still underestimated myself and my skills. Girl Boss helped me see what I was already capable of. In March 2026, I sat for a placement interview for the first time and I answered confidently. I didn't even know I was this brave!”*

Launch Girls

A world where all girls own their futures

Launch Girls prepares adolescent girls and young women, ages 14-24, across South Asia and Africa to transition from education to meaningful economic participation. Through its entrepreneurial education programs, grounded in research from MIT and the World Bank, it builds work-readiness skills, agency and support networks that enable adolescent girls and young women from underserved communities to pursue employment or entrepreneurship. Since 2020, it has reached 26,000+ young women across 16 countries. Today, 80% of its programming is in India, where it partners with Governments in Telangana and Karnataka.

"I have been selected for the Chevening scholarship for 2027. LedBy played an important role in this, especially with the essay on networking. Even in my interview, I used an example of how, through LedBy, we network and have formed a tribe." This is indeed a dream for me to study an MSc in Gender and Development at LSE. Resham, LedBy graduate

LedBy Foundation

Unlocking Muslim women's talent India's economy is missing

LedBy Foundation is a Harvard-incubated nonprofit advancing economic mobility for Muslim women in India, one of the country's most excluded workforce demographics, facing a labour-force participation rate of just ~21%. It operates on the thesis that talent is universal but access is not: through fellowship and accelerator programs, an entrepreneurship track and a research pipeline including a J-PAL RCT and a hiring-bias study (cited by BBC and the US Congress), it addresses discrimination at both the individual and systems level. It is building a labour-market institution, not just a program.

"I grew up watching my father work hard every day just to keep us going. Lighthouse gave me the confidence and skills to build something more for myself. Today, I lead a team, own a home and support my family fully. It all started with believing I could do it."

Altaf Sayyad

Lighthouse Communities

Lives and livelihoods for underserved urban youth

The Lighthouse Communities Foundation (LCF) program impacts lives and livelihoods for underserved youth. A highly personalised program, it nurtures their agency to envision and realise sustained livelihoods. Lighthouse champions a pioneering public-private partnership model, with capital expenditure and facilities backed by local and state governments, while the private sector supports operational costs (manpower and training). To ensure exemplary livelihood services, the city's ecosystem is leveraged by forging partnerships with value-aligned skilling institutions and employers. Lighthouse targets a minimum coverage of 25% of total households in every slum community of the city, in order to reach an inflection point to facilitate non-linear socio-economic shifts.

"I once set my dreams aside for everyone else, but today my story has taken a new turn. With renewed courage and confidence, I have found my wings and I am flying toward my own future."

Kanchan Devi

Manzil Mystics

Making music education accessible while creating sustainable livelihoods for grassroots musicians.

Manzil Mystics uses music to expand educational opportunities, strengthen communities and create livelihoods. It brings music education to government and low-income schools, helping children develop creativity, emotional resilience and a sense of belonging. Through its 18-month Learning Through Music Fellowship, Manzil Mystics trains grassroots musicians from underserved backgrounds to become skilled educators and professional performers. By connecting quality music education with meaningful livelihood opportunities, the organisation is building a sustainable ecosystem where children benefit from joyful, inclusive learning experiences while musicians gain pathways to dignified careers, creating lasting social impact through the power of music.

Kajal says *"I joined NavGurukul at 17 with only a basic 10th-pass qualification, coming from a background where my father works as a rickshaw puller and my mother as a domestic cook. Through the residential program, I completely transformed my trajectory, secured a full-time placement at an MNC and am now earning 15 LPA—a reality I previously couldn't have even dreamed of."*

Empowering underserved youth to build meaningful careers

NavGurukul is a technology-led non-profit that helps underserved young people in India build dignified, future-ready careers through fully funded, outcomes-driven education. Its residential and online programs offer self-paced training in software engineering and life skills. Beyond campuses, it expands access through its Remote Finishing School, digital labs using refurbished laptops, AI learning initiatives and government partnerships that bring practical digital skills into schools and ITIs. NavGurukul focuses on first-generation learners, especially young women and works to turn potential into opportunity at scale.

"I hesitated to attend Communion 3.0 in Kochi since I felt immensely underprepared for any GDPI session, but I'm more than glad I went. The sessions were super helpful and gave me a clear framework on how to approach GDPI prep. The mock interview and GDs helped in assessing my weaknesses. I also got to meet some amazing people, one of whom is now a close friend. Overall, an experience way greater than any expectation I had and I'm very sure Communion played a crucial role in my prep."

- Betssy Babu | Pathanamthitta, Kerala | Aspirant CAT'2025

Working towards a world where every student can access quality higher education and achieve their full potential.

Opengrad is a free, all-inclusive platform designed to help students succeed in competitive exams, offering curated content, video lectures, mentorship and valuable resources handpicked by accomplished alumni and students from top institutions. Think of it as a peer-driven learning ecosystem where those who've already cracked the exams guide the next generation. Opengrad's mission is to democratise access to higher education by leveraging technology and community to provide no-cost, relatable and scalable pathways from career awareness to admissions and beyond for students from underserved communities, because great guidance should never come with a price tag.

"First I wanted to do something from a science background — B.Tech or B.Sc. But after my entrepreneurship classes at Panaah, I decided to make a career in sports and chose my college for that. I am now in Mahabaleshwar as a PE Teacher Intern across four schools, teaching sports and running physical training sessions. I have gained communication, planning and leadership skills and it has been a great opportunity to make a positive impact on students' lives."

Suraj Vispute (Panaah Professionals)

Panaah Communities

To equip children and youth from Pune's highest-need urban communities to learn faster and earn better.

Panaah Communities works with children and young people in Pune's low-income urban settlements through three connected programmes. Solvers supports academic recovery for Grades 4–9 and helps out-of-school adolescents return to formal education. Scholars offers high-rigour Math and Science preparation, benchmarked through national and international olympiads. Professionals helps 16–21-year-olds secure quality first employment earning ₹30,000+ monthly. In 2026, Pune Municipal Corporation partnered with Panaah to bring Solvers and Scholars into its schools.

“The biggest change is that I now focus on execution instead of just ideas. Through YouStart, I earned my first income, built a product through real user feedback and gained the confidence to take action instead of waiting for things to be perfect. The experience also helped me secure a Founder’s Office internship at an early-stage startup.” Pavani DB, You Start program

Polygnan

Empowering youth for the AI-driven future of work

Polygnan Foundation is reimagining engineering education for the future of work. We believe future-ready engineers can be nurtured in India through experiential learning, mentorship and real-world execution. We work with engineering students to build the skills, mindset and confidence needed to become builders, problem-solvers and changemakers. Through cohort-based programs like YouStart, applied AI skilling and student-led venture building, we help young people move from learning to doing and from ideas to tangible outcomes. Our goal is to create a stronger pipeline of confident, capable and industry-ready engineering talent.

“I come from rural Kashmir, where I completed my schooling and undergraduate degree. From a young age, I dreamed of pursuing higher education in the UK but didn't know how to make it happen. While pursuing my first master's at the University of Kashmir, Project EduAccess visited my university for an outreach program. Their team encouraged me to apply for a second Master's at Oxford, guided me through the process, helped me with my Oxford scholarship interview and patiently answered every question. EduAccess helped me get to Oxford, but it became so much more than a support system—it feels like a family.” Tabina Manzoor, Mentee

Project EduAccess

Democratising access to higher education, leadership and professional opportunities

Project EduAccess is a non-profit that works to expand access to higher education and meaningful career opportunities for under-served youth in India. Through mentorship, leadership and skill-building fellowships, workshops and partnerships with public colleges and universities, we help underprivileged youth build the skills, knowledge and networks they need to access scholarships, postgraduate study, research opportunities and purpose-driven careers. Alongside this direct support, we collaborate with institutions and policymakers to address the structural barriers that continue to limit educational opportunity and social mobility for under-served youth.

“I don't want to marry yet. I want to stand on my own feet.” Today, instead of an early arranged marriage, Sampatti is assembling cars at Tata Motors—paving the way as one of the first young women from her district to enter formal manufacturing.” Sampatti, Career Mobility program

Project Potential

Enable intergenerational social mobility for youth in India's poorest districts

Potential means that your birth should not determine where you end up in life; yet, in much of Bihar, birth remains destiny, with nearly one-third of youth not in education, employment, or training. Project Potential enables rural youth to build aspiration, strengthen leadership capability and access opportunities for upward mobility. It serves as a trusted bridge between rural communities and high-quality career pathways. Through its partnership with Jeevika, it runs career development libraries and connects youth to training and placement partners in fields such as software engineering, hotel management, healthcare and manufacturing apprenticeships.

"For years, I stood outside the gates of a private school in Lucknow, watching children my age walk through doors that felt permanently shut to me... I had never even heard of the RTE Act until RightWalk Foundation told my family it gave children like me the chance to study in a good school, free of cost, up to Class 8... When I reached the end of that road, RightWalk stepped in again—their RTE Scholar Fund supported my education beyond Class 8, so I didn't have to walk away. Today, I am in Class 12 at Jaipuria School, still dreaming of becoming a Chartered Accountant." Aarti Kashyap

RightWalk Foundation

Making public policy deliver education, livelihoods and health to end poverty

RightWalk Foundation (RWF) is a public policy implementation and state-capacity-building organisation. It ensures that progressive public policies work for people at scale—not just on paper, but in real lives, over time. Its RIGHT model—Redesign, Institutionalise, Ground, Hone and Transition—converts policy intent into sustained, government-owned outcomes. RightWalk operates across four states, has impacted over 20 lakh lives and unlocked more than INR 20,947 crore in economic value, including public funds and market-linked opportunities. By strengthening state systems, it turns public entitlements into durable pathways out of poverty for underserved communities. It combines policy reform, institutional capacity and last-mile delivery to make change durable and scalable.

Skilled Samaritan Foundation

Creating income opportunities for women artisans through tech-based design support for sustainable products.

Skilled Samaritan Foundation (SSF) creates sustainable livelihood opportunities for women and girls from marginalised communities who lack formal education. It builds on existing craft skills, providing physical and technology-enabled design, market support through partnerships with corporates, designers and service providers. Its projects, primarily focused on sustainable livelihoods, vocational skills, women empowerment and waste-to-wow concepts, are designed and delivered with utmost transparency, speed and commitment to create sustainable products for the home, furniture and lifestyle space for the growing conscious buyer. Today, SSF works with nearly 1,500 women who are breaking barriers and leading lives of dignity and respect.

SRUJNA SHEROES 2026

"Srujna's training changed how I saw myself, I went from learning how to manage money to teaching other women how to do it. Now, through my workshops, I get to watch women in my community gain the confidence to save, budget and plan for their future. Knowing I've helped build that kind of security for so many families is what makes this work meaningful to me." Suma Lata , Financial Literacy Project

Srujna

Providing women in poverty with the ecosystem, skills and tools to earn a respectable income and bring positive change in their communities

Srujna Charitable Trust is a Mumbai-based NGO working towards women's economic empowerment, currently operating across 9 states in India and reaching over 3 lakh women. Established in 2011, Srujna runs four core programs — financial literacy, sales training, Superdidi leadership development and micro-enterprise incubation; designed to work as an intentional pipeline moving women from economic awareness to economic empowerment. With a vision to impact lives of 1 million women by 2030, Srujna focuses on leveraging tech and AI to scale its intervention.

“Through Step Ahead India, I discovered many other ways to create social impact. With career guidance and mentorship, I explored the social sector and joined the Gandhi Fellowship. As a Fellow, I worked with tribal communities and the Education Department in Madhya Pradesh, supporting over 500 teachers and 5,000 students. Today, I am a program Leader at Kshamtalaya Foundation, contributing to teacher development and well-being.” - Babli Yadav

StepAhead India

Enabling underserved Arts, Humanities & Social Sciences youth to build meaningful, purpose-driven careers.

Step Ahead India enables Arts, Humanities & Social Sciences (AHSS) youth from Tier 2, Tier 3 and rural India to transition into meaningful careers in Impact sectors. While millions of AHSS graduates aspire to serve society, most are exposed only to competitive exams, often spending years in the exam cycle with little awareness of alternative career pathways. Step Ahead expands these pathways through technology-enabled career awareness, job readiness, personalised mentorship and placement support. By connecting youth to fellowships, Young Professional, Govt. consulting, NGOs, CSR and development careers, we help them transform years of uncertainty into purposeful, economically sustainable careers.

Before the AI training, I used to depend on visual judgement and customer feedback for arranging clothes. Now, AI helps me plan store displays, match colours and even design promotions. It saves time and gives my store a professional edge.” Prathamesh, AI Empowerment Training program

Tisser Artisans Trust

Empowering artisans through sustainable handmade innovation, livelihoods and enterprise development

Tisser Artisans Trust is dedicated to preserving India's rich textile and craft heritage while creating sustainable livelihoods for artisan communities. Working across rural and urban clusters, Tisser empowers artisans through design innovation, skill development, market linkages, entrepreneurship support and digital inclusion. The organisation collaborates with government agencies, corporates, academic institutions and development partners to strengthen artisan enterprises and promote responsible, inclusive growth. By integrating craftsmanship with contemporary markets, Tisser is enabling artisans to achieve independence while safeguarding cultural heritage. Through a holistic approach, Tisser is building artisan ecosystems, to impact over 50,000 artisans across India over five years.

Baeru Collective

Building human and cultural infrastructure for India's coastal transition

Baeru Collective has worked with coastal communities since 2020, building climate-first livelihoods, culture and leadership along the coast. The Collective enables women from fishing and harbour communities to become independent micro-entrepreneurs in waste recovery while restoring coastal ecosystems. Its programs span livelihood training, youth engagement and cultural campaigns that root conservation in coastal identity. Working alongside panchayats, harbour authorities and fishing communities, Baeru Collective has trained over 5,500 women, supported a network of 1,500 micro-entrepreneurs and anchored community-led recovery of coastal waste across Karnataka's shoreline.

"Before joining IDEA, I was running a small fast food business, but it wasn't generating enough income because of low customer demand. The Entrepreneurship Development program taught me market assessment, business planning and informed decision-making. With the confidence and entrepreneurial mindset I gained through IDEA and a ₹25,000 DHAN loan, I started an e-rickshaw service. Today, I earn a stable income, support my family with dignity and have built a sustainable livelihood despite the challenge of living with a disability." Rishi Pandey

Empowering persons with disabilities through entrepreneurship and inclusion

Inclusive Divyangjan Entrepreneur Association (IDEA) is a national organisation dedicated to empowering Persons with Disabilities (PwDs) through entrepreneurship, skill development, incubation, market linkages and financial inclusion. Since its inception, IDEA has supported more than 2,000 entrepreneurs with disabilities across 10 states and over 60 districts in India. Through initiatives such as the Divyangjan Hunar Atamnirbhar Network (DHAN), entrepreneurship development programs, seed grants and digital commerce platforms, IDEA enables persons with disabilities to build sustainable livelihoods, create jobs and become economically independent, contributing towards an inclusive and self-reliant India.

“When I joined i-Saksham, my family warned me that if I stepped out to work, I would not be allowed back home. ... i-Saksham helped me find my voice, confidence and purpose. As I changed, my family changed.

When I moved to another city for work, my husband took to caregiving. ... My proudest achievement is seeing women from my village step out to work, pursue higher education and choose their own futures. My journey taught me that when one woman gets an opportunity, she transforms not only her own life, but her family, her community and the generations that follow.” Nandini, Edu Leader

i-Saksham

Building local young women as 'Leaders of Change'

With the vision of 'Voice and Choice for Every Woman', i-Saksham develops young women as change leaders through its 2-year Edu-Leader Fellowship. The program addresses roots of women's exclusion, including patriarchal norms, limited role models and negotiating power. Edu-Leaders build confidence, mentor 20–25 adolescent girls, engage families to shift gender beliefs and influence institutions. Over 1,100 Edu-Leaders have impacted 25,000+ adolescents and families. Its alumni achieve a 90% college enrolment rate, compared to Bihar's 12% average and a 50% placement rate in civil society and corporates. i-Saksham aims to build 10,000 women leaders influencing one million girls, enabling girls to complete school and women to step into public life.

"Kaarigar Clinic transformed my mindset and my life. I began as an agricultural labourer and, through continuous mentoring and entrepreneurial support, grew my business from ₹4,000 to ₹13 lakhs in just three months."

Indu Parghi | Business Wellness program | Cohort 10

Kaarigar Clinic

India's first business clinic for artisans

Kaarigar Clinic is India's first Business Clinic for Artisans, pioneering a new model of entrepreneurship that places artisans at the centre of economic and social transformation. The organisation empowers artisans to become entrepreneurs through business incubation, creative capacity building, design innovation, branding, digital skills, market access and leadership development. By helping artisans move from informal labour to enterprise ownership, Kaarigar Clinic enables sustainable livelihoods while preserving India's living craft traditions. Its work strengthens local economies, creates employment and positions artisans as business leaders, ensuring creativity becomes a pathway to dignity, prosperity and long-term social impact.

Mamta Choudhary, a creative entrepreneur from Maheshwar, Madhya Pradesh, sold about 3,500 metres of self-designed fabrics through Karghewale and other platforms in FY 23-24. This achievement resulted in an average annual revenue of ₹9.5 lakhs, marking a 300% increase from her baseline revenue before starting her incubation journey with Karghewale.

Karghewale

Empowering weavers to become entrepreneurs.

Karghewale is an artisan-led textile platform that empowers young weaver entrepreneurs across India by connecting them directly with national and global markets. The organisation brings together skilled handloom artisans under a shared brand, enabling them to design, produce and sell high-quality handcrafted textiles while retaining ownership of their businesses. Working with over 150 weavers across multiple states, Karghewale promotes sustainable livelihoods, ethical production and contemporary design rooted in traditional craftsmanship. By providing business incubation, market access and entrepreneurial support, Karghewale helps preserve India's rich handloom heritage while creating dignified and sustainable income opportunities for artisan communities.

“Joining Karya brought a profound transformation to my life, which I am truly proud to share. The most significant change is that my family can now eat three meals a day, a basic dignity we struggled with before. This work gave me the skills and independence to lift us out of a very difficult financial situation. Beyond the self-respect and confidence I have gained, Karya has provided the stability we desperately needed.” - Worker from Telangana, \$578 earned to date

Karya

Leverage the AI revolution to create dignified earning and learning opportunities for low-income communities across the world

In India, Karya's smartphone-based digital work platform has enabled over 180,000+ people to build language datasets and evaluate AI models while earning fair wages. Trusted by leading organisations including Microsoft, Google, Anthropic, OpenAI and the Gates Foundation, Karya designs and delivers end-to-end pipelines across data, evaluation and deployment. With pilots in Kenya, Indonesia, South Africa and Ethiopia and partnerships with leading AI labs, governments and foundations, we are advancing language technologies for underrepresented communities. By combining dignified digital work with frontier AI innovation, Karya aims to build a new AI economy that is equitable, inclusive and community-driven.

“My organisation, Pagdandi Foundation aims to negate the factors that push migration. The fellowship gave me the encouragement to execute concepts that I knew of. It enabled me to take action. Moreover, I could look at my work from different lenses as pushed by my mentors and facilitators.” Ekta Aggarwal, Pagdandi Foundation

Margshala

Enabling rural youth to build dignified livelihoods close to home

Margshala Foundation enables rural youth in the Western Himalayas to build dignified local livelihoods in their communities. It works across the full journey from exploration to enterprise. Khojshala helps young people discover viable local livelihood pathways through exposure, guidance and role models, while the Swarozgar Fellowship supports aspiring and early-stage entrepreneurs with mentorship, peer learning and ecosystem linkages. Its Local Livelihoods Library extends this work through a mobile digital platform offering localised sector information, entrepreneur stories and personalised guidance. Till date, Margshala has worked with 6,000+ people and supported 250+ enterprises across agriculture, tourism, handicrafts and digital services.

Bhairappa, a person with dwarfism, experienced significant discrimination while growing up and was rejected by more than 70 companies at job fairs. He now leads a team of seven people and is married to Roopa, whom he met at Miti Cafe.

Mitti Cafe

Brewing inclusion, serving dignity, creating livelihoods, transforming communities with every cup

Mitti Café is creating dignified livelihoods and fostering economic independence for persons with disabilities and individuals from other vulnerable communities. Through inclusive cafés and catering services operated by trained employees with disabilities, it challenges societal stereotypes while delivering exceptional hospitality. Partnering with airports, educational institutions, hospitals, corporate offices and public spaces, it combines high-quality food with meaningful employment, skill development and public sensitization. By building inclusive workplaces and demonstrating the immense potential of every individual, Mitti Café advances equality, transforms perceptions and creates sustainable social impact across India and beyond.

Empowering marginalised women through textile upcycling to create livelihoods and handcrafted toys that bring joy to terminally ill children

SVATANYA India Foundation transforms pre-consumer textile waste into premium handcrafted products while creating sustainable livelihoods for marginalised women. The organisation trains and employs women in upcycling, traditional handcrafting, embroidery and stitching, turning environmental preservation into a pathway for financial independence and social mobility. By preserving heritage crafts and promoting a human-centric circular economy, it gives new life to textile waste. It also creates a special range of upcycled toys that are gifted to underprivileged children fighting terminal illnesses in government hospitals, bringing hope, joy and comfort during difficult times.

access and inclusion

creating pathways to opportunity, dignified livelihoods and independence for everyone

* Image sourced from Canva.

"Things have changed a lot for me. Through Akam Foundation's livelihood project, I was able to set up my food stall. As I became financially independent, my parents gradually became more accepting and the respect I receive at home has grown. Today, I feel more confident in myself and hopeful about my future."

Biku, Livelihood Security program

Akam Foundation

Just & equal society where everyone can live with dignity

Akam Foundation is a transgender-led organisation, advancing gender justice, education and community empowerment in Assam and Northeast India. Guided by the values of equality and inclusion, they work to strengthen the rights, dignity and leadership of transgender and queer communities through sustainable livelihood initiatives, access to rights and entitlements, leadership development, mental well-being and inclusive education. It also promotes free community libraries as feminist learning spaces that expand opportunities for children and marginalised communities. By combining grassroots action, research, advocacy and community-led solutions, they aim to build a more just, inclusive and equitable society.

“Through Chalo Network’s Chalo Saathi programs, I learned how to protect myself from fraud, avoid sharing OTPs and links and stay cautious during online transactions. Earlier, I used to pay more than necessary in transaction charges, but now I am aware and make better decisions. I feel that such training can benefit the entire community.” Lakshmi, Chalo Saathi program

Chalo Network

Making financial services inclusive and accessible for migrants everywhere

Chalo Network is a financial solutions company focused on improving the financial well-being of migrants and their households across India. It develops and distributes financial products designed around the unique needs of migrant workers throughout the migration cycle. Through its flagship platform, Pravasi Money, Chalo Network connects migrant borrowers with formal lenders, enabling access to suitable credit while supporting onboarding, financial awareness, data verification, credit assessment and repayment. Working with agents, NGOs, employers, contractors, recruiters and lending partners, it combines technology, data, research and last-mile distribution to help migrants move from informal to formal financial services and build greater financial security.

"It is hard to find affordable healthcare for drivers like us. This clinic made it easy for me to take care of my health while on the job." Sheikh Arif, Heavy Goods Vehicle Driver

HumSafer Driver Safety

HumSafer promotes safer driving through monitoring, training, awareness and accountability.

The HumSafer Driver Safety Foundation is a road safety initiative focused on improving driver behaviour, reducing accidents and promoting safer transportation practices across the logistics and commercial vehicle industry. The organisation works with transporters, fleet owners, corporates and drivers to create a culture of safety through technology, training, awareness programs and performance monitoring. By tracking safety-related parameters, recognising driving and encouraging improvement, HumSafer helps organisations enhance driver well-being, protect assets and improve operational efficiency. Its mission is to make roads safer by fostering accountability, education and safety management within the transportation ecosystem.

I-Stem

Making education, information and employment accessible for persons with disabilities

Over 96% of websites remain inaccessible to assistive technology, locking persons with disabilities out of education, information and employment. I-Stem is building AI infrastructure to close that gap, founded by blind leaders with lived experience of inaccessibility. The platform delivers career discovery, adaptive learning, document accessibility conversion and task automation across inaccessible interfaces, supplemented by on-ground programs that ensure adoption and effective use. I-Stem has reached 64,000+ users through 70+ partner organisations across 15+ states, made 2.3 million pages accessible and is integrated into Sugamya Bharat, the government's national disability platform, helping users gain meaningful employment and live independent, dignified lives.

"Migrating from Gonda to Ahmedabad, I wanted to build a better future while serving my community. With Online Saathi's training and support, I established my own digital service centre. Today, I help 100–200 people each month access banking, insurance, loans, government schemes and essential services while earning ₹10,000–₹12,000 per month. Online Saathi gave me the confidence to run my business and connect with customers beyond my network. My dream is to mentor more entrepreneurs, so every community has a trusted local Saathi." Rajesh Kumar

Online Saathi

Build India's largest last-mile network connecting every citizen to opportunities with trust and dignity

Online Saathi is a social enterprise building India's largest last-mile network of local entrepreneurs to connect underserved communities with essential opportunities. Through a technology-enabled platform and trained community entrepreneurs ("Saathis"), we provide access to government schemes, banking, remittances, insurance, employment, digital documentation and other essential services. Our model combines technology with trusted local support, making services accessible, affordable and inclusive. By empowering local entrepreneurs, Online Saathi creates sustainable livelihoods while advancing digital and financial inclusion and expanding access to essential public services for migrant workers and underserved communities across India.

“The same trains that once meant begging, hawking, coal collection, humiliation and survival now carry us towards training, markets and livelihood-building. Through the Action Research Lab, we are beginning to reclaim public spaces, rebuild confidence and imagine futures beyond survival.”

- Rocky, Muskan and Rajjak

Community-led, data-driven, evidence-based ecosystem for dignity, justice and inclusive livelihoods

Pleqsus builds inclusive livelihood pathways through four interconnected verticals: Livelihoods; Policy Research & Advocacy through the Centre for Queer & Transgender Studies (CQTS); Awareness & Social Transformation through PROJECT KHAIRATI; and Health. Across these verticals, PLEQSUS combines community mobilisation, evidence generation, livelihood pilots, policy advocacy, legal awareness, health support and QT-BHARATH, an AI-enabled Digital Public Good (DPG). Working with 43 CBOs across 10 states, PLEQSUS strengthens grassroots institutions and community leadership, enabling transgender, gender-diverse, queer and GSM communities to access resources, opportunities, services and formal systems.

Protsahan India

Rebuilding the lives of girls facing violence, exploitation and poverty, so they can stay safe, learn and dream again.

Protsahan India Foundation works at the intersection of child rights, trauma-informed care and systems strengthening. Over the last 15 years, the organisation has worked closely with adolescent girls experiencing violence, ultra-poverty, migration, child marriage and other forms of adversity to help them heal, stay in school and build self-reliant futures. Alongside direct care, Protsahan partners with families, frontline workers and government systems to strengthen child protection and prevent harm before it escalates. Through CareVerse, the organisation equips frontline responders with the knowledge, skills, tools and ongoing support to recognise adversity early, respond with confidence and improve outcomes for vulnerable girls.

"We always wanted to become independent and start a home-based microenterprise. After I became a part of a Self Help Group through Sol's ARC, I was supported for a loan which helped us make a down payment for an auto rickshaw and start a small business of homemade spices. Now we wish to work harder and take this business ahead for our future"

- Bharti Ben

Sol's ARC

Creating scalable learning solutions that meet diverse learning needs of all children

Sol's ARC enables sustainable livelihoods for persons with disabilities, guided by its vision, "Every Child Learns, Every Adult Earns." It challenges segregated approaches by embedding disability inclusion within mainstream livelihood and financial systems. It develops community-based models that enable persons with disabilities to access rights, government entitlements and financial services. Its work includes mobilising people into SHGs, strengthening access to credit and government schemes and supporting them to start or grow enterprises and local opportunities. In partnership with government, NGOs and community institutions, Sol's ARC demonstrates scalable models in the rural economy, enabling greater financial independence and dignity.

ecosystem & institutional strengthening

*strengthening partnerships, systems and
institutions for lasting change*

Justice Manmohan Singh shares, “ As chief justice, one of the biggest challenges I face is the growing demand for stenographers, at a time when the available pool is limited. Adalat AI addresses this constraint to a large extent. Its speech-to-text capability frees up stenographers for other critical functions. I am deeply grateful to the Adalat AI team. This is precisely where AI should be used - it is the right application of the technology, one that directly responds to the needs of the justice system. In my view it will be a true game-changer.”

Adalat AI

Our mission to make timely and equitable justice a reality for all

Adalat AI is building end-to-end digital infrastructure to enable paperless courts. Deployed across 5,800+ courtrooms in 11 Indian states, covering approximately 24% of India’s judiciary, with statewide mandates in Kerala, Sikkim and Andhra Pradesh, it replaces fragmented paper-based workflows with integrated digital systems for filing, case registration, judicial workflows, multilingual courtroom transcription, document generation, digital signatures and litigant communication. Judges report 2–3× higher hearing throughput and 30–50% reductions in documentation time. Adalat AI augments judges and court staff by eliminating repetitive administrative work, enabling greater focus on judicial decision-making, while integrating with existing systems without requiring new courtroom hardware.

Civis seeks to increase citizen participation in the lawmaking process, to generate public awareness and provide education on issues of civic importance.

Empowering citizens to shape policy.

Civis is a civic technology platform that enables citizens in India to participate in government policymaking through public consultations. It simplifies complex draft laws and policies into easy-to-understand summaries, helping people provide informed feedback to lawmakers. Users can explore active consultations, discuss policy proposals and submit responses directly through the platform. They aim to make governance more transparent, inclusive and participatory by bridging the gap between citizens and the government. By encouraging public engagement in decision-making, Civis empowers individuals to shape policies that affect their lives and strengthens democratic participation across India.

“After reading Anita ji’s Ground up story, Praveen Bhatt, who runs his own IT company, reached out to IDR with the intention of supporting the author. Recently, he contributed a total of ₹1 lakh (₹9,000 earlier and ₹91,000 later) to help Anita ji repay her bank loan. He is also working towards purchasing her honey in the future through his company.”

Anita Dhakad

India Development Review

Democratising access to knowledge

India Development Review (IDR) believes that knowledge is a powerful catalyst for change and that diverse voices and lived experiences should shape the social sector. By publishing insights, research and practical lessons from practitioners, policymakers, funders and community leaders, IDR democratises access to high-quality knowledge. The platform fosters informed dialogue, collaboration and learning across the development ecosystem, helping organisations make better decisions and amplify impact. Through accessible, practitioner-led content, IDR strengthens the social sector by ensuring that valuable knowledge is shared, recognised and available to everyone working to create change.

“I had a property issue and one of my friends introduced me to OutLawed India. With their help, I was able to start the legal process for the property issue and it was very useful for me. My eagerness to learn more made me join the paralegal training with OutLawed India. From being a client of a paralegal, I have become a paralegal myself! After this training, I now know how to help people in my community who need support, how to assist with documents, how to guide people and how to provide counselling to the concerned person.” Madhav Manchanda, Volunteer from Uttarakhand

OutLawed

Making the law accessible to all.

OutLAWed India is a not-for-profit organisation working towards enabling last mile justice delivery. They train and deploy community paralegal volunteers who provide free legal aid. From assisting domestic violence victims with drafting and registering a police complaint to drafting and sending legal notices for wage recovery to assisting victims of child sexual abuse, these paralegals serve as a bridge between law and underserved communities.

Across 2025 and 2026, OutLAWed India designed and implemented Karnataka's first state-wide paralegal volunteer training initiative.

Manjubai from Shelkui, Maharashtra says, "I was able to add a room to my house to ensure adequate space for my children, without having to incur any debt."

Project DEEP

Reshaping welfare in India with direct cash transfers for inclusive growth.

Project DEEP operates at the intersection of policy and practice to catalyse inclusive welfare systems that maximise economic outcomes for 300 million vulnerable citizens in India. It operates across three key focus areas: direct unconditional cash transfers, research and analysis of cash transfer schemes and partnerships with state governments on welfare design and delivery. Through its work, it has so far disbursed INR 5.5 crore to communities, enabling asset creation and income enhancement; published India’s first consolidated analysis of cash transfer schemes, and partnered with the governments of Maharashtra and Punjab to strengthen welfare delivery.

Sargun Kaur, Researcher at Prosperiti, presented key findings on land, building, and approvals reforms to unlock tourism growth at a national workshop and the launch of NITI Aayog and the Ministry of Tourism's report, Unlocking Growth in the Tourism and Hospitality Sector: Recommendations for Non-Financial Regulatory Reforms.

Prosperiti

Building state capacity to drive economic freedom in India

Prosperiti is a public-purpose organisation driving economic freedom across Indian states. It started its journey to lift a billion people into prosperity. It is on a mission to catalyse a series of 1991-like reforms at the state level so that entrepreneurs can create more jobs and workers can earn more. It produces actionable insights on state-level regulation, identifies opportunities for reforms, helps build policy consensus and supports governments in implementing systematic deregulation. It releases issue-specific State of Regulation reports and bi-weekly broadcasts to help states make informed decisions. In partner states, it provides design, drafting and execution support. For the near term, their focus is to reform labour and land use regulations.

"I always knew I liked working with wood, but I never imagined it could become my livelihood. At CMYC, I found the tools, guidance and encouragement to improve my skills. The nano grant has helped me take the next step towards opening a workshop of my own." Elvistar Pyngrope, Chief Minister Youth Centre

Sauramandala

Accelerate social and economic change in underserved communities through collaborations.

Sauramandala Foundation (SMF) is a Bengaluru-registered nonprofit working across Meghalaya and the Northeast to accelerate social and economic change through collaborative action. Its Centre for Accelerated Development (CFAD) approach helps communities understand challenges, co-design and test solutions, generate evidence and support adoption within larger systems alongside governments, civil society and local institutions. Under the World Bank-funded MPOWER project, SMF is scaling Chief Minister's Youth Centres from 22 to 42, expanding access to learning, skills, sports, counselling, innovation and entrepreneurship. Its work also includes Forgotten Folklore, DRIVE incubation and testing distributed clean energy for remote, off-grid communities.

*“The collaborative FR system is intriguing, I’ve been working on a model myself. I would love to connect,
learn and share some insights.”*

Building the digital backbone of the social impact sector through open-source infrastructure, systems integration and capacity building.

Social impact initiatives are often expected to adapt to tools and systems that were never designed for their realities. Limited budgets, lean teams, fragmented workflows and dependence on external vendors frequently leave organisations navigating technology that adds complexity rather than reducing it. Tech4Good Community (T4GC) was created to address this gap. It has grown into a national community of more than 2500 non-profits across India. Through capacity building, technology stewardship, open-source infrastructure and ecosystem partnerships, the organisation supports social change initiatives in making informed technology decisions while avoiding costly vendor lock-ins.

“As a PONIC, with the support of my colleagues & WAIC, we evaluated the cases of children who have been living in Child Care Institutions for many years. In the category of no visitation of their guardians and with huge support of WAIC, we identified 5 children and they have all come into the adoption pool. In this, two children are reserved by the PAPs. I think this is the first NGO to promote legal adoption.

Thank you WAIC.”

- Protection Officer Non-Institutional Care, Nagarkurnool District, Telangana

Where are India's Children

Working for a child's right to a family through adoption for children in CCIs

Where are India's children (WAIC) works to ensure that orphaned and abandoned children living in Child Care Institutions (CCIs) have the opportunity to grow up in permanent, loving families through adoption. The organisation identifies children eligible for adoption, supports the legal processes required to declare them adoptable and facilitates their inclusion on the Mission Vatsalya adoption portal. WAIC collaborates with government agencies, Child Care Institutions and adoption agencies to strengthen adoption systems, improve data transparency, build stakeholder capacity and enable every child's right to a family.

Jann16

Enabling access to justice through conversational AI solutions

Jann16 builds AI-powered, multilingual, audio-enabled legal chatbot assistants on WhatsApp, co-created with lawyers, NGOs and technology partners. Their tools help individuals understand their rights in simple language, while enabling NGO field workers and helplines to deliver consistent "legal first aid" at scale without building parallel infrastructure. Currently operating through partnerships across Rajasthan, Gujarat, Maharashtra, Karnataka, Delhi and Tamil Nadu, it aims to build a network of 100+ NGOs reaching over one million people.

Slam Labs

AI-enabled maths learning inside government schools

SLAM Labs embeds a pedagogy-first, AI-enabled learning system inside government-school schedules, working within the system rather than around it. Every topic follows a Concrete-Pictorial-Visualisation-Abstract progression. Instructional Language Models generate visual explainers in the child's own language, on demand. The 2024–25 pilot recorded up to 42% gains in conceptual understanding, with 80 schools and 11,000+ students already confirmed through government partnerships for 2026–27. It aims to reach 1M+ children by 2031.

Shifu

Empowering founders from underserved Tier 2+ districts to build revenue-earning companies

The Shifu Fellow program aims to support driven early-stage founders from India's underserved districts through three forms of support: early funding, access to follow-on capital and up to ₹1 crore in startup credits, alongside bootcamps, mentorship, storytelling support and warm introductions. It will be delivered by builders who have navigated these same barriers. Bihar, Jharkhand and Andhra Pradesh are Shifu's priority states for groundlevel work, alongside online outreach across India. The ambition: support 15,000 fellows within the next 5 years

our mentors

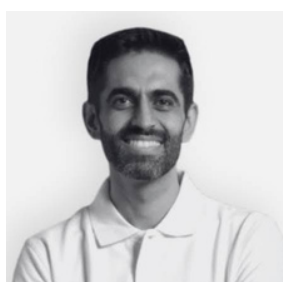

Abhijit Patwardhan | Founder, AltLyf

Abhi is Founder of Alt Lyf and author of Painting Your Retirement Canvas. With 25+ years of global leadership across technology and FMCG, including HP and Lexmark, he applies design thinking to career and life transitions. He is also a social innovation coach with Dalai Lama Fellows. An IIM Bangalore and Stanford school alumnus, mentor, adviser, sailor, dog trainer and trustee, he champions purposeful longevity.

Arti Ahuja | IAS [retd], Ex- Union Secretary Labour and Employment

Arti Ahuja is a retired IAS officer with 34+ years in public administration, policy and program management across key ministries. She led major reforms in worker welfare, nutrition, women's empowerment and India's COVID-19 response. A Harvard and Princeton alumna, she now contributes to academia and advises on women's issues, health and nutrition.

Atul Satija | Founder Mentor, The/Nudge

Atul Satija is Founder Mentor of The/Nudge, founded to advance resilient livelihoods towards a poverty-free India. He guides its strategic direction, bringing two decades of experience across entrepreneurship, technology, sales and business development. Before this, he spent five years at InMobi, helping scale it into a global leader in mobile advertising and earlier led Google's mobile business for Japan and Asia-Pacific. He holds a B.Tech from NIT and an MBA from ISB.

Gopichand Katragadda | Founder and CEO, Myelin Foundry

Dr. Gopichand Katragadda is Founder and CEO of Myelin Foundry and an Independent Director at Bosch India, Asian Paints and ICICI Securities. Former Group CTO and Innovation Head at Tata Group and CMD of GE India Technology Centre, he has led major technology and R&D initiatives. Gopi holds BE, MS and PhD degrees in Electrical Engineering.

Jugal Mohapatra | Non-Executive Chairman, Shriram Finance Ltd. & Padraka Foundation

Jugal Mohapatra brings over 37 years of public administration experience, including serving as Secretary to the Chief Minister, Principal Secretary (Finance), Development Commissioner and Chief Secretary of Odisha. He also served as Secretary of Fertilisers and Rural Development, Government of India. He holds master's degrees in Economics from Delhi School of Economics and Boston University and a Ph.D. from XIM University.

our mentors

Jagdeesh Puppala | CEO, Living Landscapes

Jagdeesh Puppala is a thought leader at the interconnected spaces of ecology, equity and economy, with 40 years of experience in systems thinking and grassroots action. Former CEO of the Foundation for Ecological Security, he currently leads Living Landscapes. A Skoll Award winner, Henry Arnhold Conservation Fellow and Senior Ashoka Fellow.

K R Lakshminarayna (Lan) | Chief Endowment Officer, Azim Premji Foundation

Lan set up one of India's first endowment funds, at the Azim Premji Foundation, to sponsor various philanthropic activities in the areas of education, grants, healthcare and other areas of development. He currently manages investments of the multi-billion-dollar endowment while playing a governance and strategy role at the Foundation. Lan is an MBA and PhD from IIM Lucknow and has previously served as Chief Strategy Officer and Head of M&A for Wipro Technologies.

Maneesh Dhir | Former Managing Director, Apple India

Maneesh Dhir is a Board member of The/Nudge Institute. A large part of Maneesh's career has been in building growth businesses, in both corporate and entrepreneurial leadership capacities, with significant stints in both Silicon Valley and India. He holds an MBA from Stanford University and is an alumnus of University of California, Los Angeles and IIT, Delhi.

Nikunj Jhaveri | Chairman & Founder Systems Plus Group of Companies

Nikunj Jhaveri is Founder and Chairman of Systems Plus Group, bringing extensive IT and leadership experience, including as CIO at PepsiCo Asia. Since 1987, he has championed 'giving back,' directing profits toward health, education, livelihoods and marginalised communities. An IIT Bombay alumnus, Nikunj also supports non-profits and leads Rotary service and fundraising initiatives in Mumbai.

Paresh Parasnis | Former CEO, Piramal Foundation

Paresh Parasnis, a chartered accountant, is the former CEO of Piramal Foundation, where he drove innovative solutions for large-scale social impact. Previously Executive Director & COO of HDFC Standard Life, he serves on several non-profit boards. He holds a B.Com from Mumbai University and is a Fellow Chartered Accountant.

our mentors

Piyush Shah | Co-Founder, InMobi

Piyush Shah mentors and invests in founders who build at the intersection of tech, innovation, purpose and impact. He is strongly driven by the purpose of 'unlocking the fullest potential in people' especially students, youth and entrepreneurs with a mission to unlock their "Ikigai" or "unique game," the point where purpose, success and joy converge. He has invested in 45-50 startups as an angel and is a board member of the^delta.

Raj Gilda | Co-founder, Lend A Hand India

Raj Gilda spent two decades optimising spreadsheets at Citibank, Deloitte, NSE and Tech Mahindra in New York and Mumbai, presumably including his retirement plan. In 2011 he quit to offer vocational education in government schools. As Co-founder of Lend A Hand India, he partners with state governments, reaching 20+ states, 2M+ students yearly. Plus: a Chevening scholarship, a UT Austin MBA and an ornamental engineering degree.

Rekha Koita | Co-Founder, Koita Foundation

Rekha Koita is Director and Co-Founder of Koita Foundation, focused on digital health adoption and NGO transformation in India. With experience at Accenture and Mind Matters, she leads efforts to strengthen NGO processes, technology, scale and outcomes. An IIT Bombay Distinguished Services Award recipient, Rekha holds degrees from IIT Bombay and Carnegie Mellon University.

Richa Goswami | Non Executive Board Member, EQT AB

Richa Goswami is a global marketing leader who currently serves on the board of EQT. Previously, she held a senior leadership role at Johnson & Johnson. At Fidelity International, she became the company's first-ever Global Chief Marketing and Brand Officer. At HSBC, she was its first-ever Global Chief Marketing and Customer Officer. Recognised as one of the world's top 5 CMOs in 2019, she holds a Master's in Business Administration.

Samit Ghosh | Founder, Ujjivan Small Finance Bank

Samit Ghosh is Founder of Ujjivan Small Finance Bank and served as its Managing Director and CEO until 2019. A banker for over 40 years, he began at Citibank and led retail banking launches for Standard Chartered in the Middle East & South Asia and HDFC Bank. He serves as Chairman of Parinaam Foundation. He is an alumni of Jadavpur University and Wharton School.

our mentors

Sushant Dash | CEO Tata Starbucks

Sushant Dash, CEO of Tata Starbucks, brings 28 years of consumer and retail experience. He spearheaded Starbucks' India launch in 2012 and previously drove growth at Tata Consumer Products. A MICA alumnus, Sushant has received multiple leadership and marketing accolades and is passionate about human connections and marathon running.

Sushma Rajagopalan | Partner at Rittenhouse Ventures and the Co-founder of 2ndCareers

Sushma Rajagopalan is a global IT leader and venture capitalist with 25+ years of experience transforming companies. A Partner at Rittenhouse Ventures, she serves on non-profit and technology boards and mentors startups through Harvard Innovation Lab and PACT. Previously MD & CEO of ITC Infotech, she also held leadership roles at LiquidHub and L&T Infotech. She adopts a portfolio career as a VC, an entrepreneur and a mentor to many Startups especially women.

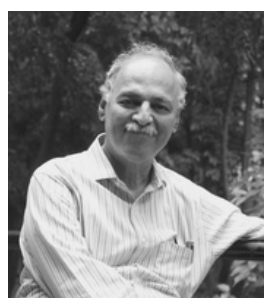

SK Jain | Founder, RatnaTraya Capital

Surendra Kumar Jain is Founder of RatnaTraya Capital and Co-Founder and former Managing Director of Westbridge Capital and Sequoia Capital India, with 25+ years of investment experience across public markets, private equity and venture capital in India. He is an alumnus of IIM Ahmedabad, IIT Delhi and the University of Minnesota and a Trustee of Plaksha University

T Koshy | Former Founding MD & CEO, ONDC

Thampy Koshy is a globally recognised expert in Digital Public Infrastructure and Digital Transformation, with 30+ years of experience. An IIM Bangalore alumnus, he has contributed to Aadhaar, CoWIN, GST, pension systems and the Tax Information Network. As founding MD of ONDC, he conceptualized and implemented India's pioneering open digital commerce network. At present Koshy is acting as a mentor to Indonesia Open Network an initiative in line with ONDC of India.

Ujwal Thakar | Former CEO, Pratham India Education Initiative

Ujwal Thakar is a banker and social-sector leader with 28 years of experience across leading institutions including SBI, Standard Chartered, BNP Paribas and Times Bank. He has served as CEO of Pratham and GiveIndia and has been an adviser to KPMG & PwC's BFSI practice. He is the Chairman of the board of Educate Girls the 2025 Ramon Magsaysay award winners and also serves on several non-profit boards. Ujwal holds a Masters degree in Physics and Biochemistry.

our mentors

Umakant Soni | Cofounder, Bharat1.ai

Umakant Soni, Cofounder of Bharat1.ai, has over 16 years of experience across 50+ AI and robotics ventures in India. He co-founded ARTPARK, AI Foundry and pi Ventures and has contributed to shaping India's national AI strategy, including the NM-ICPS and IndiaAI missions. He also served as an expert on India's behalf at the Global Partnership on AI. His work focuses on building human-centric approaches to AI development. He is also a noted keynote speaker on AI and deep tech innovation across emerging markets.

Vivek Mathur | Former Operating Partner, Elevation Capital

Vivek is a former operating partner at Elevation Capital. He assists portfolio companies scale by working with them on matters such as finance, operations, compliance and structuring. He has over 30 years of deep operational experience in finance, banking and strategy. He has previously worked at Standard Chartered and headed Dell's Global Contact Centres in India. Vivek has a B.E. from BITS Pilani & an MBA from the University of Iowa.

Vikas Agnihotri | Former Operating Partner SoftBank

Vikas is a Former Operating Partner at SoftBank Investment Advisers and Former Managing Director at Google India. He is currently on the board of Hindustan Media Ventures Ltd. He was previously a board member at Paytm, Lenskart, FirstCry, GlobalBees and InMobi. Earlier in his career, he was CEO of Religare Macquarie, with roles at Standard Chartered and Deutsche Bank. He studied management at Sydenham Institute, Mumbai University.

Ziaa Lalkaka | ED & CEO, HT Parekh Foundation

Ziaa Lalkaka is the Executive Director & CEO of the H T Parekh Foundation which works across initiatives focused on Urban Climate change (flagship), Children's literature and reading and Disability. After close to 2 decades spent in the corporate financial sector in audit, M&A advisory and real estate private equity, she transitioned to the development sector in 2014 to establish and lead (erstwhile) HDFC Ltd's philanthropic arm. She also served on Ashoka University's Board and is a Chartered Accountant by academic qualification.

ecosystem supporters

A big thank you to our ecosystem supporters who have generously shared their time, expertise and networks to strengthen our nonprofits and the wider sector — from shaping selection and mentoring cohorts, to leading sessions, sharing perspectives and opening doors to their broader ecosystems.

notes & acknowledgements

The contents of this book are based on information shared by the featured Social Entrepreneurs and organisations, as well as publicly available sources. While the^delta has made reasonable efforts to review and verify the accuracy and reliability of the information presented, it does not assume responsibility for any errors, omissions, inaccuracies, or changes that may occur after publication. Readers seeking further information or specific references are encouraged to contact the respective Social Entrepreneurs or organisations directly.

Images in this book have been shared with the necessary permissions and consents, as confirmed by the respective organisations. Some illustrations have been created using generative AI.

We have made every effort to acknowledge the many ecosystem partners, supporters, organisations, and individuals who have contributed to and supported our work. If anyone has been inadvertently omitted, we sincerely apologise for the oversight and extend our gratitude for their continued support to our programmes and the social entrepreneurs we work with.

This book was brought together by the team comprising Anvitha Reddy, Shakshi Maurya, and Kritika Sridharan, with support from Chinmayi Kulkarni, Ishadaya Karande, and Sruthy Natarajan. We thank everyone who contributed their time, ideas, inputs, and effort towards bringing these stories and the work of our alumni to life.
